

LEARN HOW YOU CAN GROW YOUR GALLONS & PROMOTE THE INDUSTRY

The **Heat Pump Helper** package, available at RMI, allows marketers to capitalize on heat-pump installations and turn them into Propane Powered households

The Heat Pump Helper package helps **consumers** to:

Reduce their electricity bills and overall utility costs

Improve the quality of their home heating – especially in cold weather

Increase the overall efficiency of their household

The Heat Pump Helper package helps **propane marketers** to:

Increase appliance sales through tankless water installations

Penetrate into a new market segment that wouldn't otherwise utilize propane

Promote propane as a clean energy source and improve the visibility of our industry

**HEAT PUMP
HELPER™**
SYSTEM INSTALL KITS

rmi
RAY MURRAY, INC.

HOW DOES THE HEAT PUMP HELPER PACKAGE WORK?

The **Heat Pump Helper** package helps you upgrade your heat pump by changing out the hair dryer style heat strips with a radiator coil that circulates hot water from your boiler, tankless, or tank-style water heater.

The package includes:

- An Aquecoil Hydronic Heating Unit – sized perfectly to fit your air handler
- A system installation kit matched to your water source consisting of:
 - A Universal Plumbing Kit
 - An Auto Air Bleed
 - A Pump and Controller as required by the application
